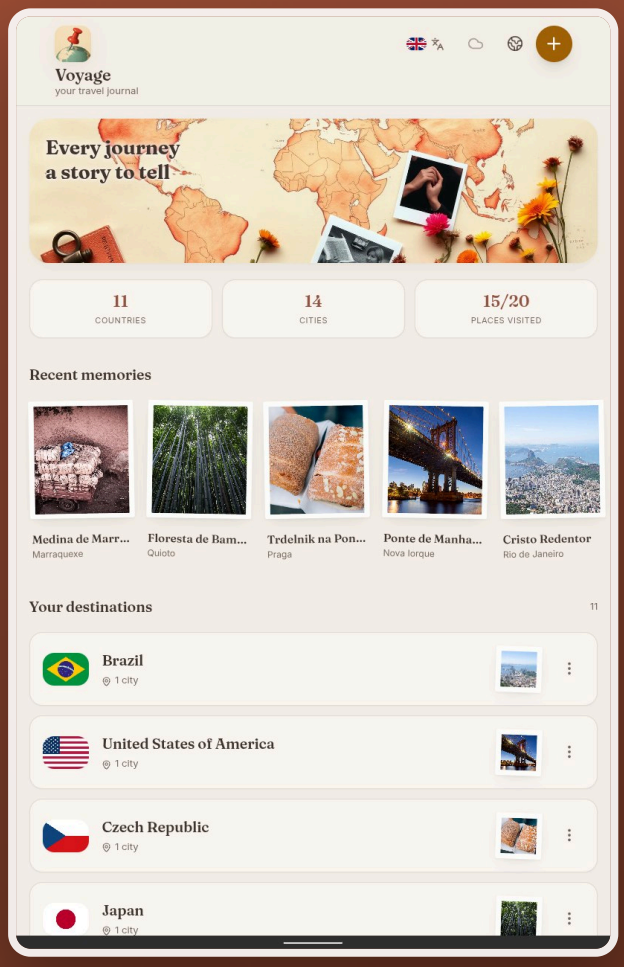
# Voyage

## QUICK GUIDE

Your travel journal



Version 1.0 · November 2026 · English

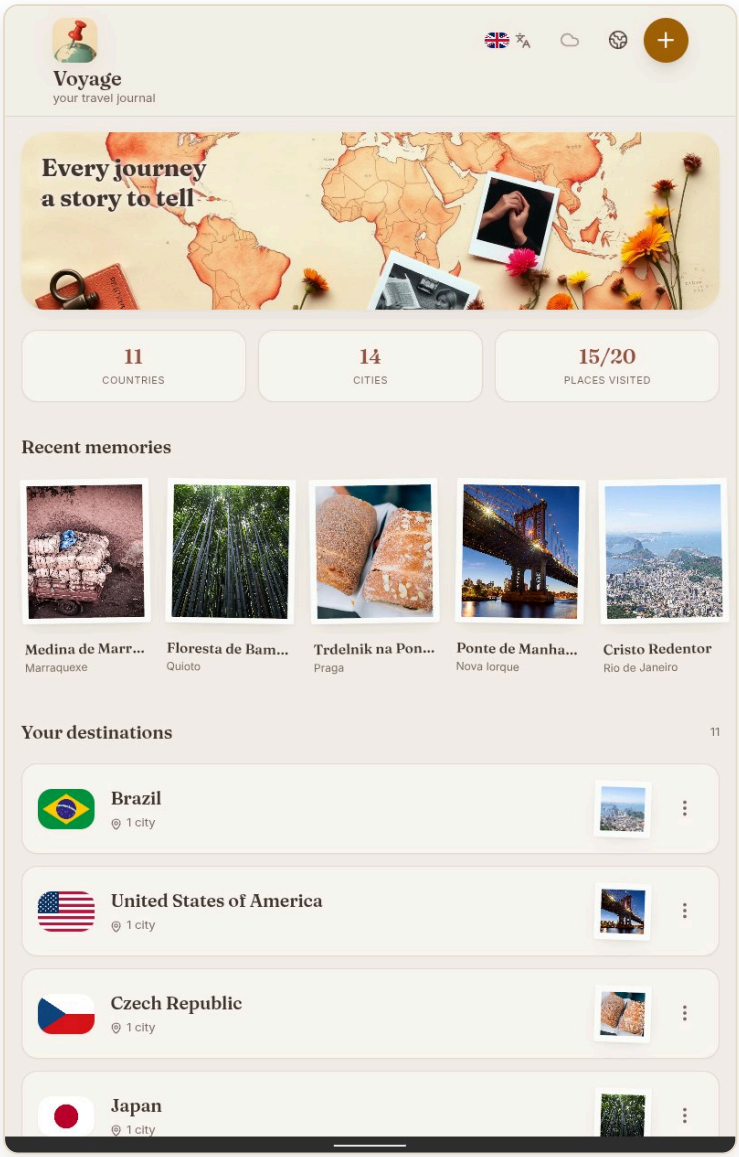
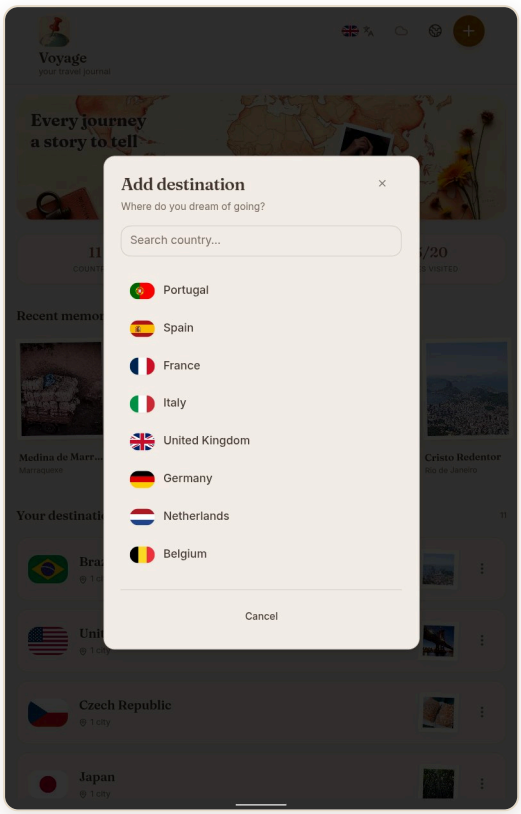
# 1 What Voyage is

Voyage is your travel journal: countries, cities, places you want to visit, and memories of the ones you've already been to, all kept on your phone, with no account required and no ads.



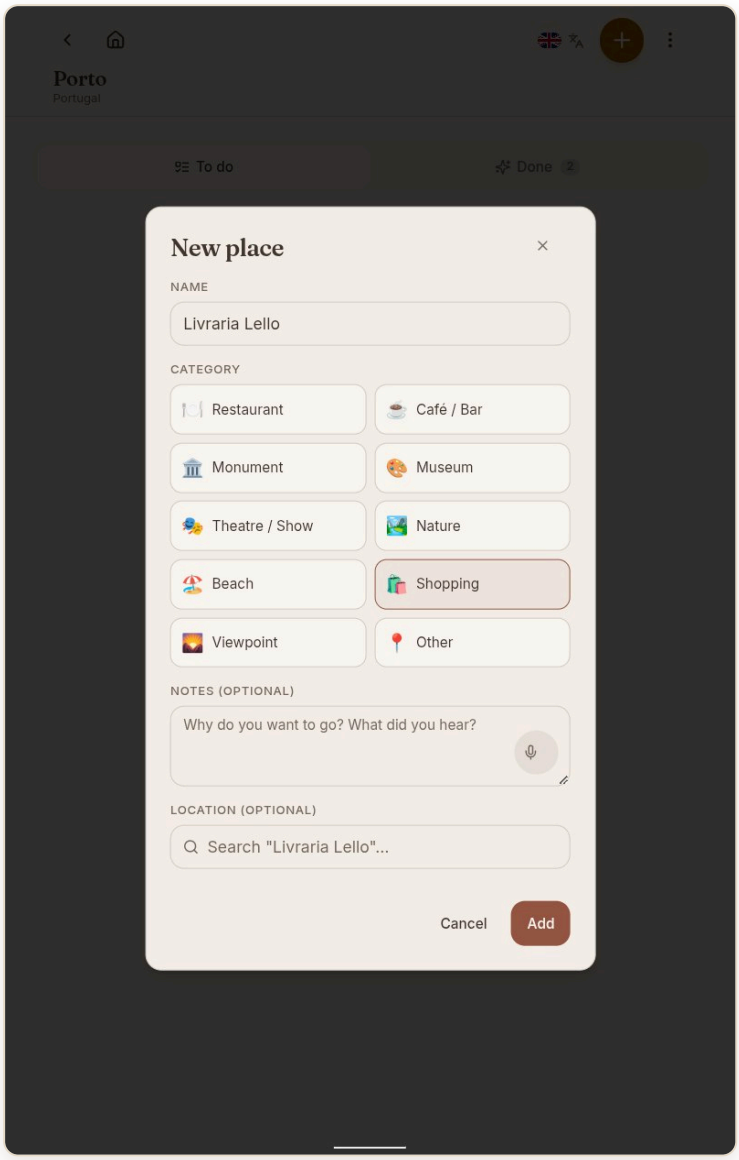
## 2 Add a destination and a city

1. On the home screen, tap the + button and choose or search for a country.
2. Inside the country, tap + again to add a city (for example, Lisbon).



## 3 Build your wishlist

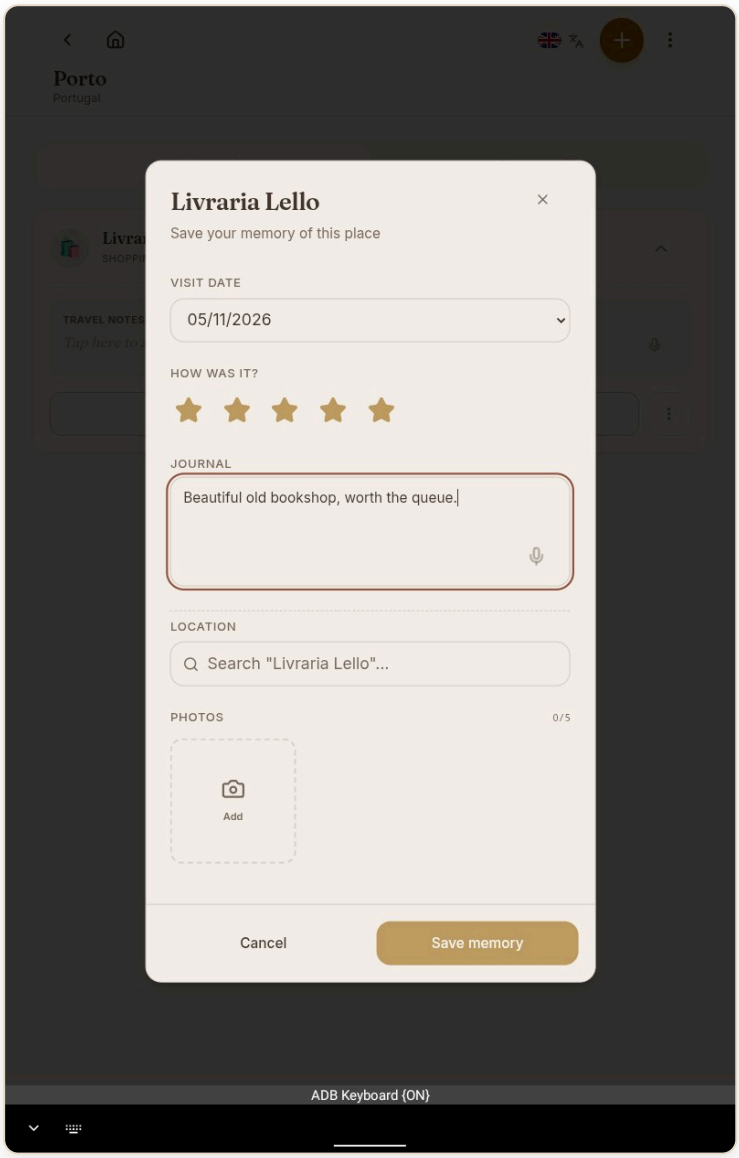
1. Inside a city, stay on the **To do** tab and tap +.
2. Give the place a name, pick a category (restaurant, monument, viewpoint…) and, if you like, a note or a location on the map.



## 4 Mark a place as visited

1. Open the place on your wishlist and tap **Mark as visited**.
2. Record the date, a 1-to-5-star rating, a short journal entry, the exact location, and up to 5 photos.

> **Tip:** Any visited place moves automatically to the «Done» tab, with your memory saved.



## 5 The travel map

Tap the globe icon at the top of the home screen to see all your countries on a single map: visited ones in a strong colour, planned ones lighter, with stats by continent.

## 6 Share and back up

- **Share the map**: creates an image ready to send over WhatsApp or Instagram.
- **Share an itinerary**: send a city or a country to a friend, who can copy the places into their own plans.
- **Google Drive**: connect your Google account (cloud icon) for automatic backup and to use Voyage on more than one device.
