21 Frequently asked questions

1 Introduction

Voyage helps you organise the countries and cities you have already visited or want to visit, and keep a memory of each place: a rating, a short journal entry, the exact location, and up to five photos.

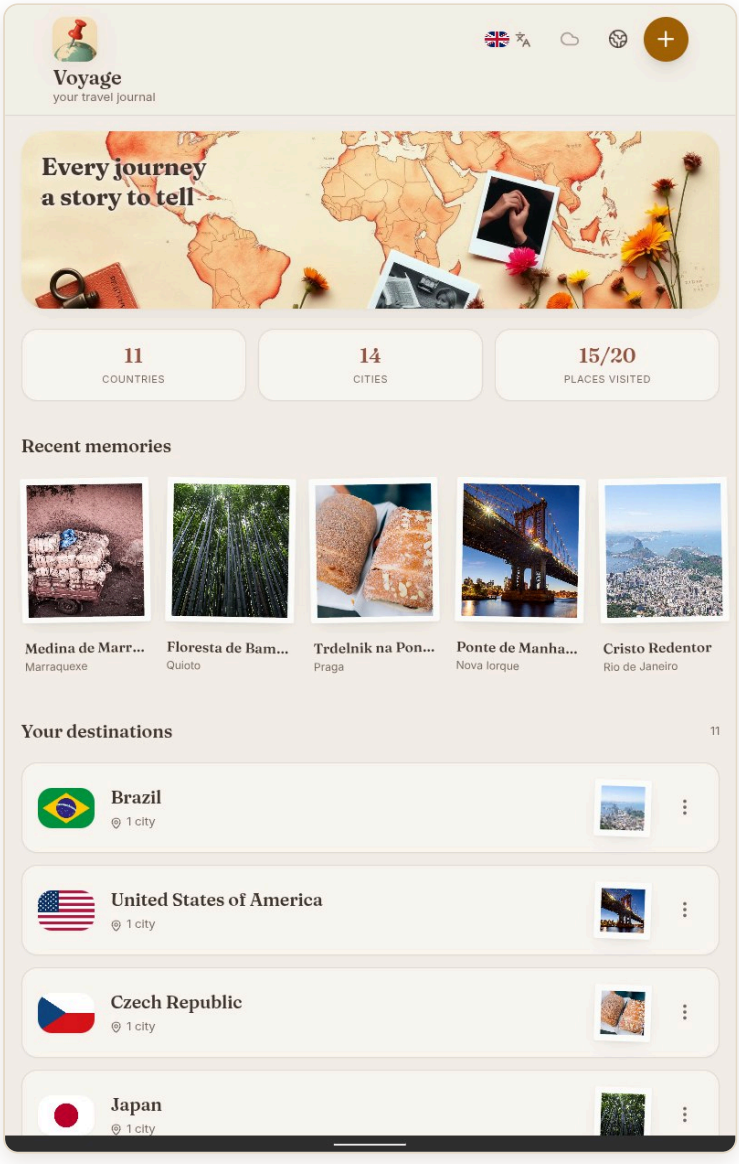
Everything is stored on your device first, so the app works without internet. You don't need to create an account to use Voyage; you only need to connect Google Drive if you want a backup or want to use the app on more than one phone.

Voyage has a free 15-day trial; after that, a one-time payment unlocks the app for good (see «Trial version and purchase»).

2 The home screen

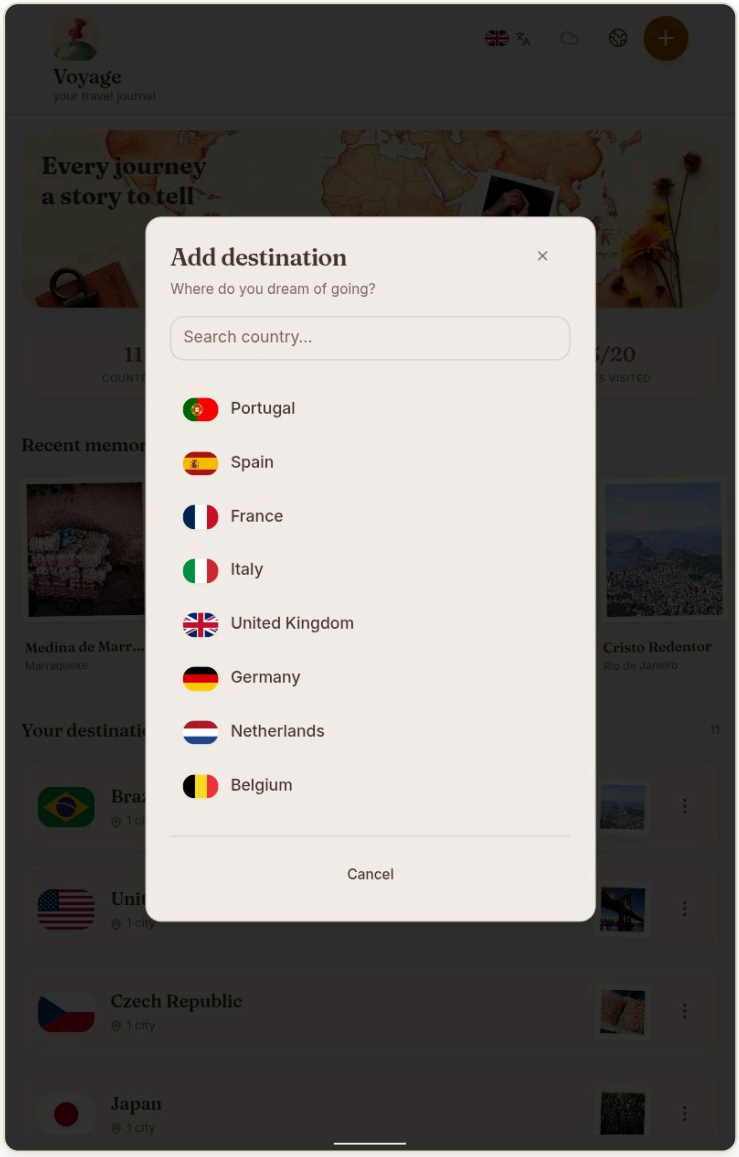
This is where you see the summary of your whole journey around the world: number of countries, cities and places visited, your most recent memories with photos, and the full list of your destinations.

Tap a destination in the list to open its cities. The three dots next to each destination give access to options such as delete.



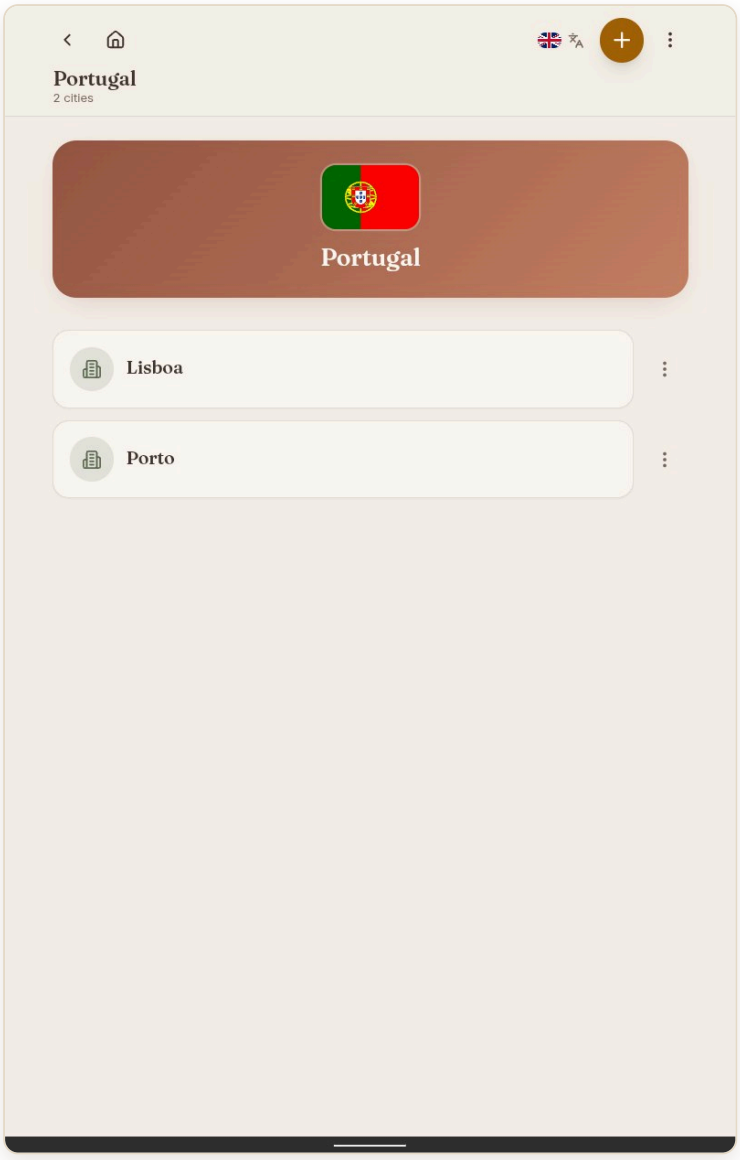
3 Add a country

1. Tap the + button, in the top-right corner of the home screen.
2. Type the country's name in the search box or pick one of the suggestions.
3. The country appears right away in your destinations list, ready to receive cities.



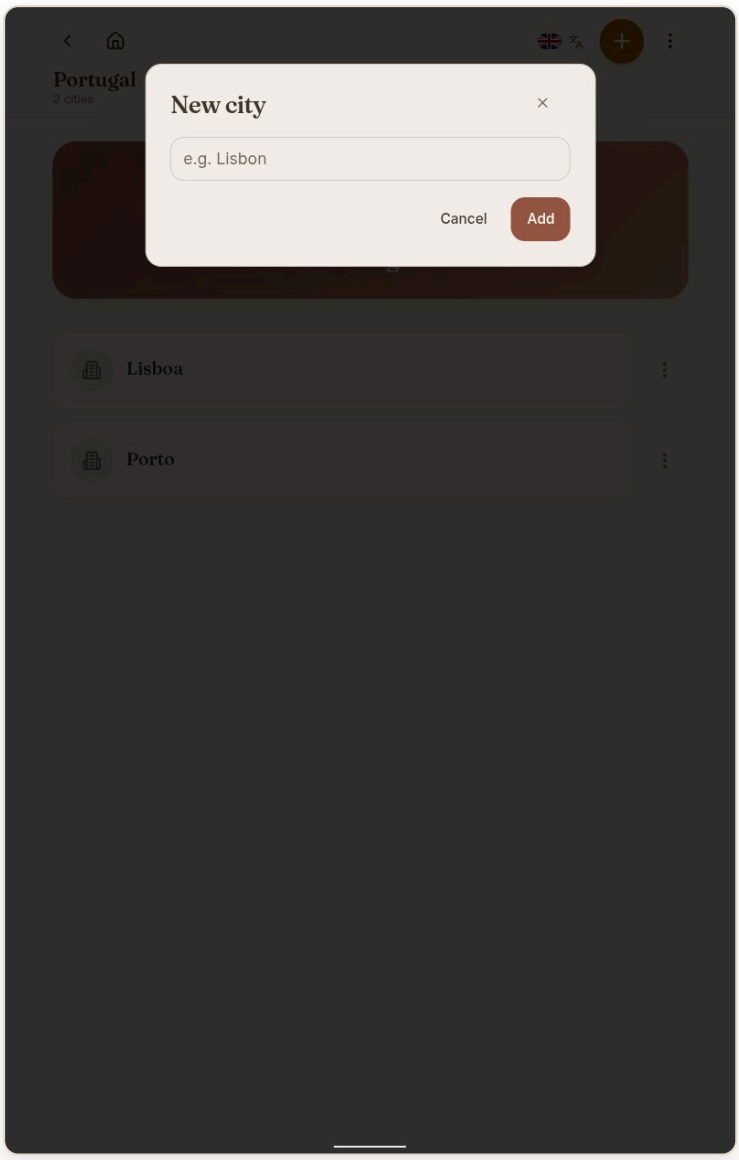
4 Inside a destination

The country page shows the flag, the number of cities already created and the list of those cities. Tap a city to open its list of places, or + to create another one.



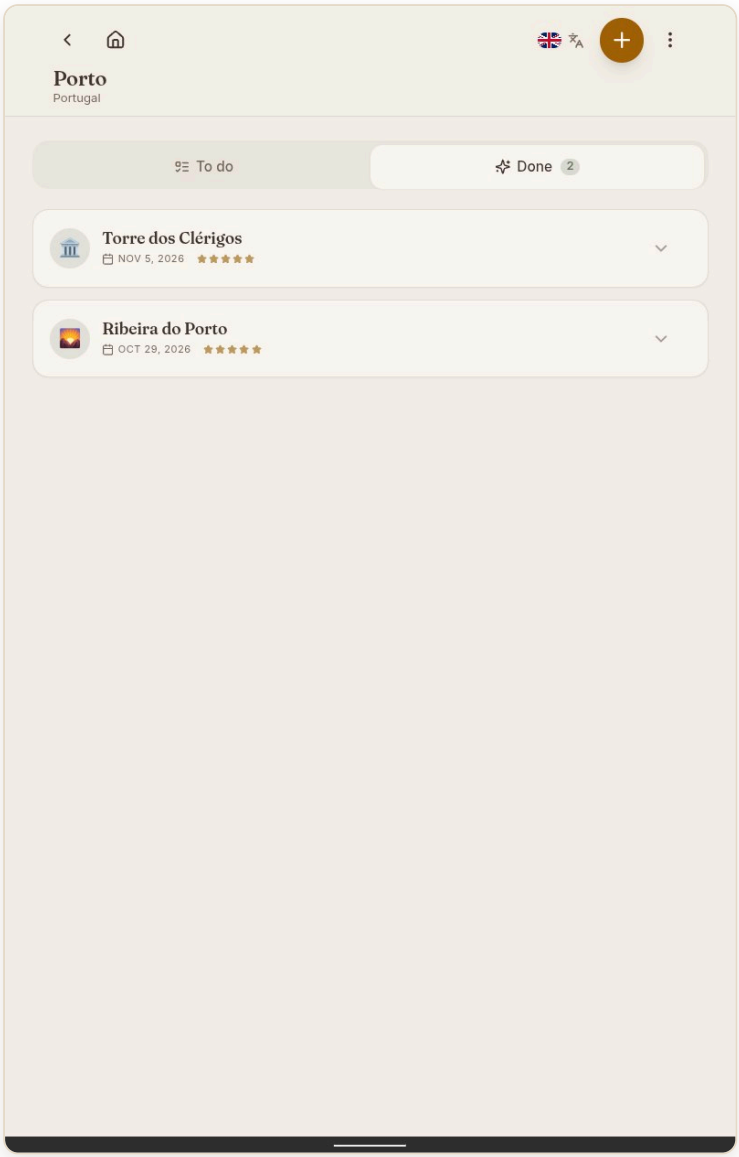
5 Add a city

1. Inside a country, tap +.
2. Type the city's name (for example, Lisbon) and tap **Add**.



6 «To do» and «Done»

Each city has two tabs: **To do**, your wishlist of places you still want to try, and **Done**, the memories of places you have already visited. A place moves from one tab to the other once you mark it as visited.

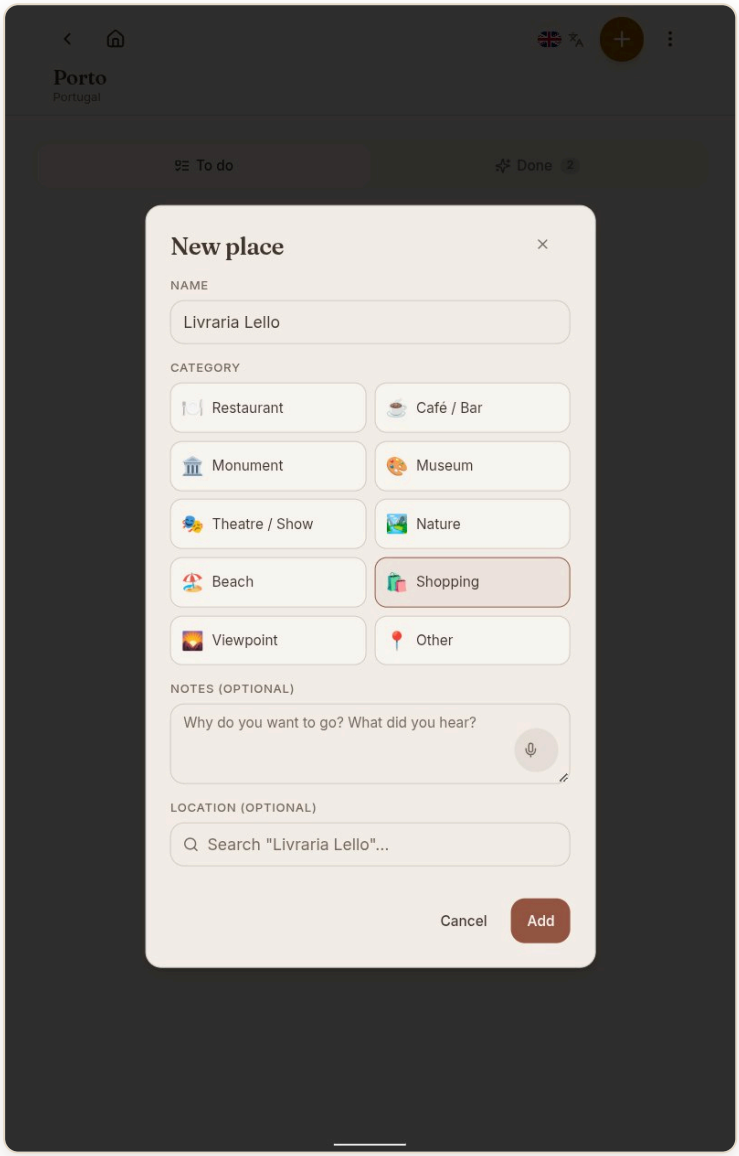


7 The empty wishlist

When a city doesn't have any planned places yet, the «To do» tab invites you to add the first one: a restaurant, a monument, a café, or anything you fancy trying.

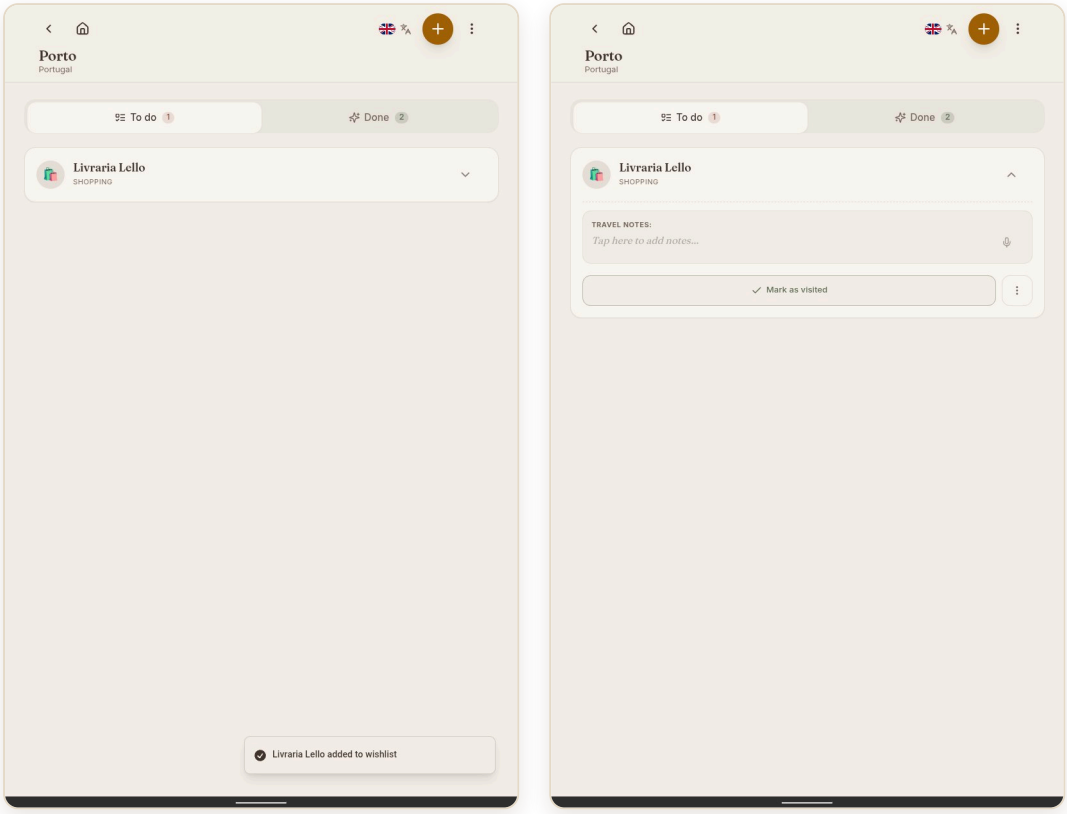
8 Add a place

1. On the «To do» tab, tap +.
2. Type the place's name and pick a category: restaurant, café/bar, monument, museum, theatre/show, nature, beach, shopping, viewpoint, or other.
3. Optionally, write a note (why you want to go, what you heard about it) and search for its location on the map.
4. Tap **Add**.



9 Place added and quick notes

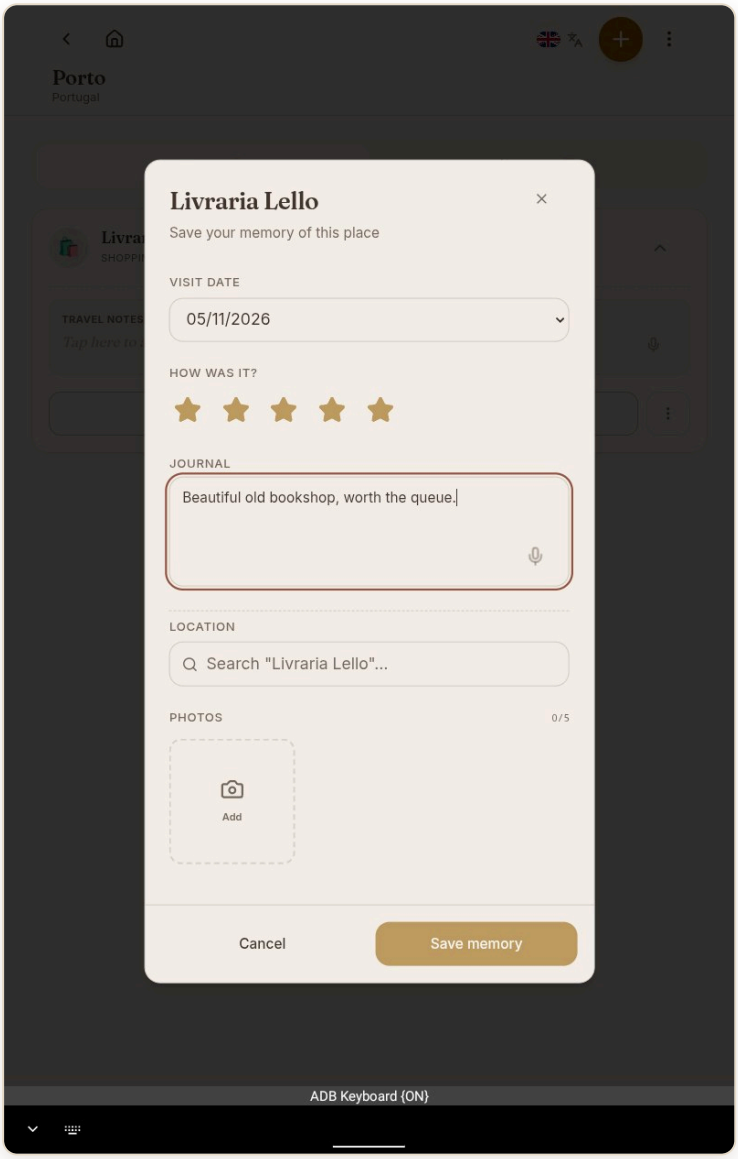
The new place appears on your wishlist with its category below the name. Tap it to expand it: there you can write a quick travel note at any time, without needing to mark it as visited, and it's also where you'll find the **Mark as visited** button.



10 Mark as visited

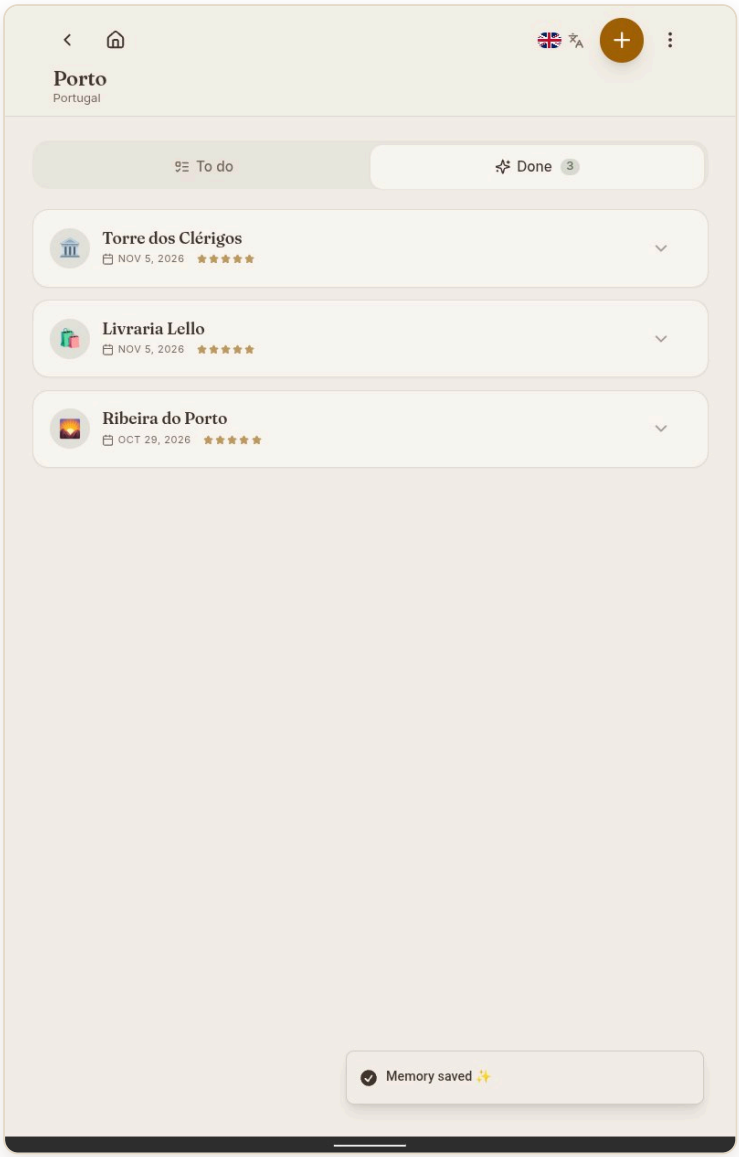
1. Expand the place on your wishlist and tap **Mark as visited**.
2. Choose the **visit date** and a **rating** from 1 to 5 stars.
3. Write a short **journal** entry about the visit — you can also dictate it by voice, by tapping the microphone.
4. Search for and choose the exact **location** on the map, if you like.
5. Add up to **5 photos** and tap **Save memory**.

> **Tip:** Every field except the date and rating is optional — you can save a memory with just a quick note, or just photos.



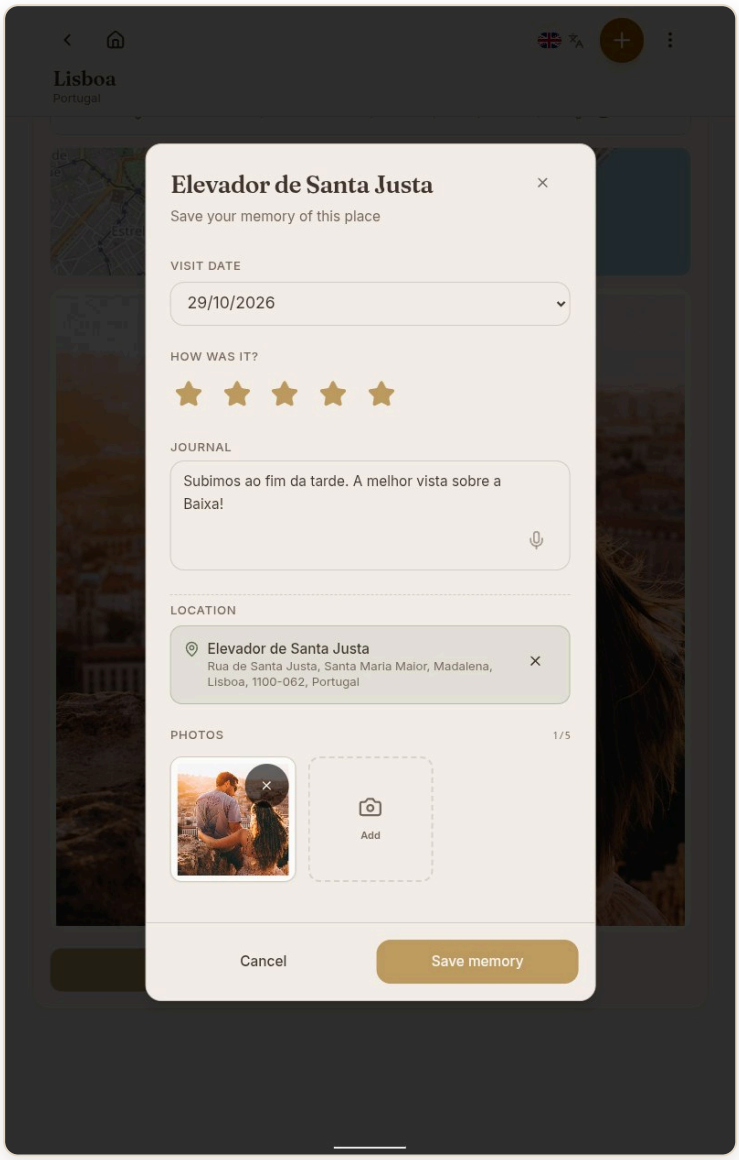
11 Your memories

The «Done» tab brings together all the visited places in that city, in date order, with the star rating clearly visible. Tap one to open the full memory: journal, location on a small map, and the photos you took.



12 Edit or delete a memory

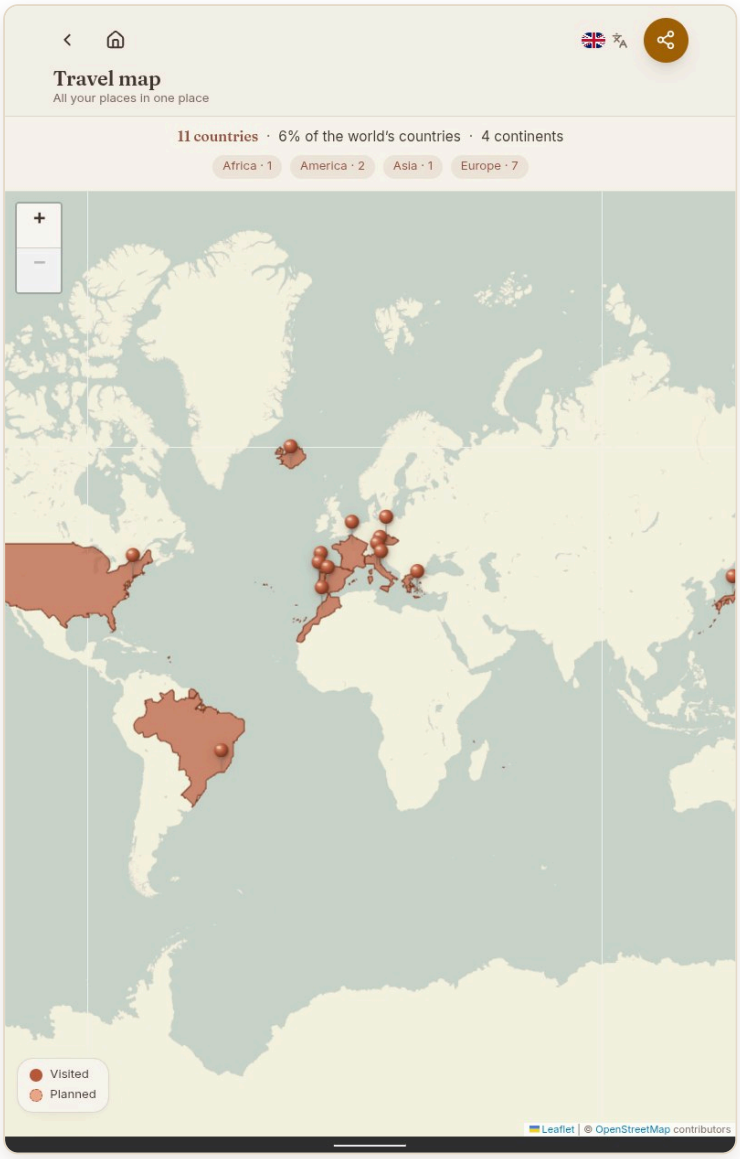
- Tap **Edit memory** to correct the date, rating, journal entry, location or photos.
- The three-dot button next to «Edit memory» lets you move the place back to the wishlist, or remove it entirely.



13 The travel map

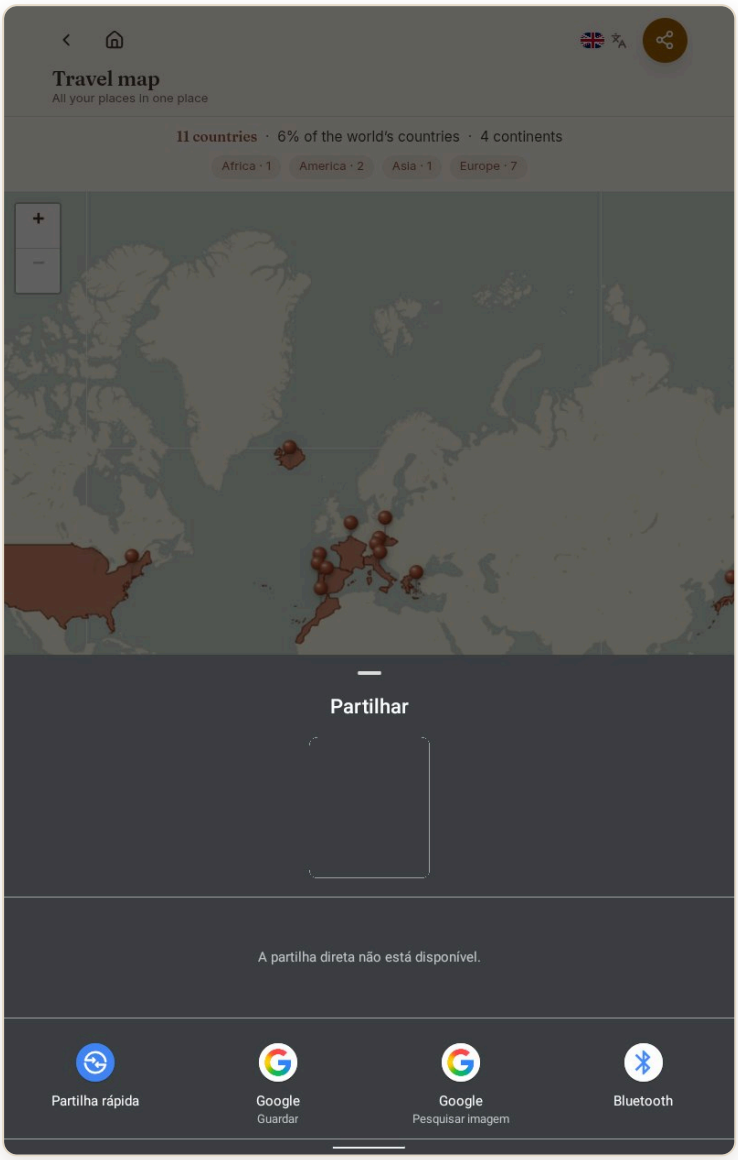
Tap the globe icon at the top of the home screen to see all your places on a single world map.

Countries with visited places appear in a strong colour; ones with only planned places appear lighter. At the top you see the number of countries, the percentage of all the world's countries, and the continents you've already visited. Each pin stands for a city; tap a coloured country to see its name and jump straight to that city.



14 Share the map

1. On the travel map, tap the share icon in the top-right corner.
2. Voyage generates an image with your map and your stats, ready to send through any app: WhatsApp, Instagram, email…

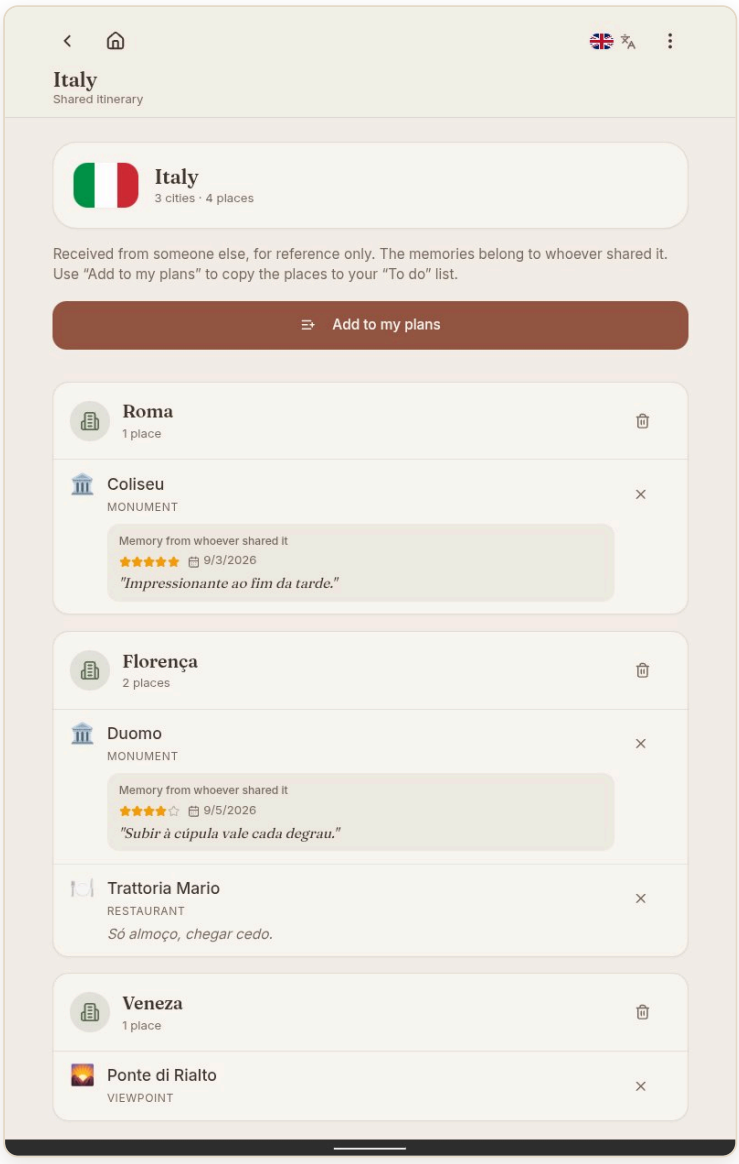


15 Shared itineraries

You can also share a whole country or city (with its cities and places) as a file, through the three dots at the top of that destination's page. Whoever receives it can open it with Voyage.

A received itinerary appears in the **Shared itineraries** section, at the bottom of the home screen. It's for reference only — the memories belong to whoever shared it — but you can tap **Add to my plans** to copy the places into your own «To do» list.

> **Tip:** Inside a shared itinerary you can also remove cities or places that don't interest you before adding them to your plans.



16 Google Drive: backups

Voyage stores everything locally on your device. If you want a backup, or to use the app on more than one phone, tap the cloud icon on the home screen and connect your Google account.

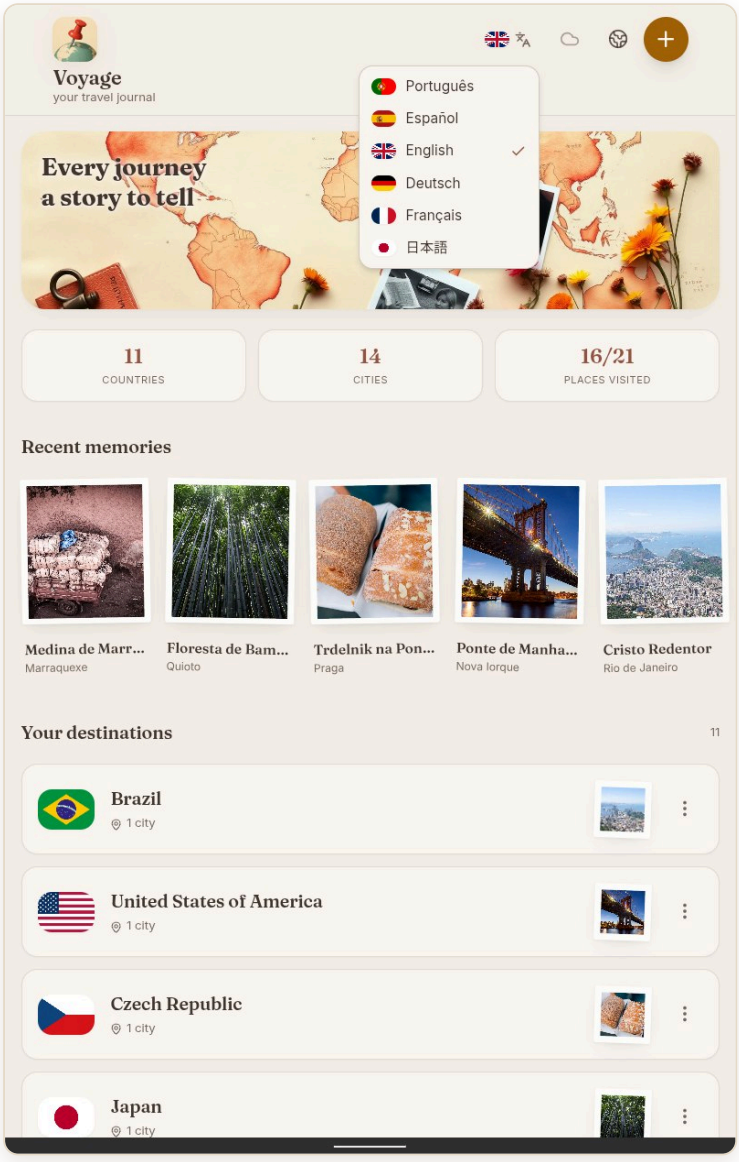
From then on, the app automatically saves a copy to your Google Drive whenever something changes. On a new device, connect the same account and Voyage will offer to restore your data.

You can disconnect syncing at any time; the data stored on the device isn't deleted.

> **Tip:** Connecting Google Drive is optional: Voyage works entirely offline and without an account.

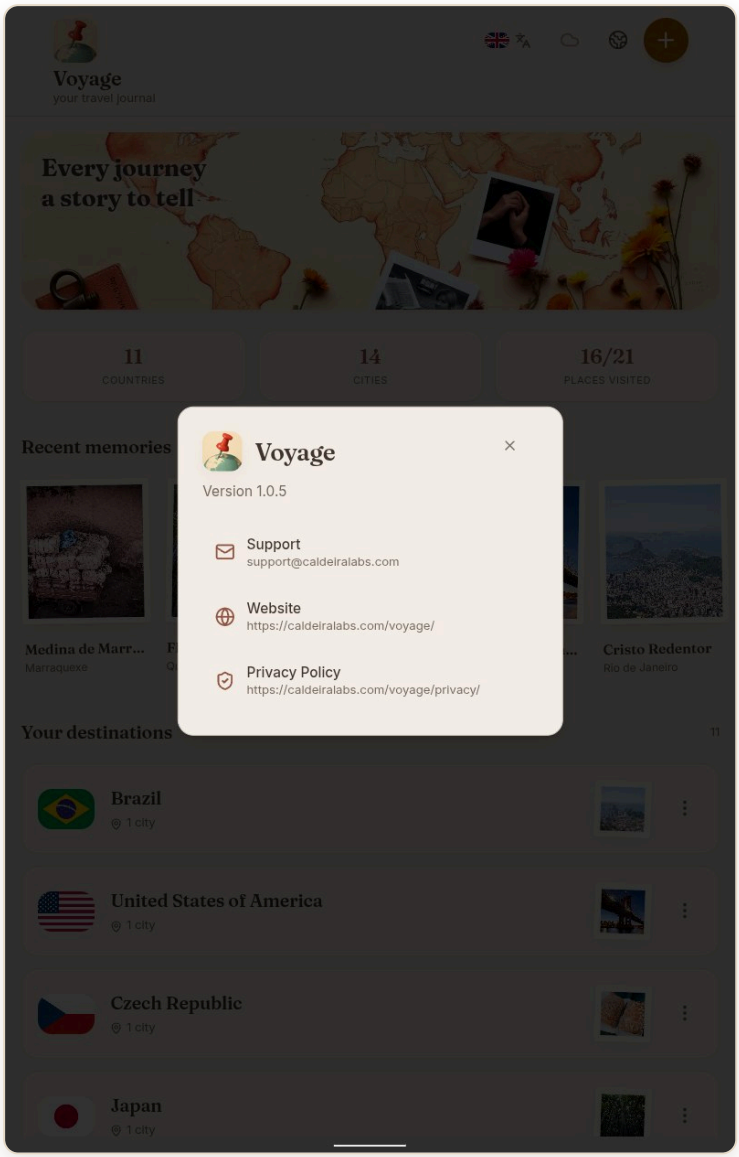
17 Change the language

Tap the flag next to the translate icon, at the top of the screen, to choose between Portuguese, Spanish, English, German, French and Japanese. The choice applies to the whole app.



18 About the app and support

Tap the Voyage icon, in the top-left corner, to open the **About** window: the installed version, the support contact, the website, and the privacy policy.



19 Trial version and purchase

You can try Voyage for free for 15 days, with up to 2 countries and 2 cities per country.

After that period, a one-time payment unlocks the app completely, with no limits and no subscriptions: every memory you've already created stays saved and available as soon as you unlock it.

20 Glossary

To do	The places on your wishlist in a city, not yet visited.
Done	Places already visited, with the memory saved (date, rating, journal, location, photos).
Memory	The record of a visit to a place: date, star rating, journal entry, location and up to 5 photos.
Shared itinerary	A country or city, with its places, received from someone else — for reference only, until you add it to your plans.
Travel map	The world map with all your countries, visited places in a strong colour and planned ones lighter.
Trial version	Free 15-day period, limited to 2 countries and 2 cities per country.

21 Frequently asked questions

Does Voyage work without internet?

Yes. Everything is stored on the device; you only need internet to search for locations on the map, load the travel map, and back up to Google Drive.

Do I need to create an account?

No. You only need to connect Google Drive if you want a backup or want to use Voyage on more than one device.

Is my data safe?

Yes. It's stored on your device and only sent to Google Drive if you turn that option on — never anywhere else.

Can I use Voyage on more than one phone?

Yes. Connect the same Google account on each device and the app will offer to restore your data from the backup.

What happens when the trial ends?

Your memories stay saved exactly as they are. To keep using the app with no limits, a one-time payment is all it takes, with no subscriptions.

How do I delete a destination, city or place?

Tap the three dots next to the item and choose delete. This action can't be undone.
